Cheese Packaging Systems Overview

With our many years of experience, HayssenSandiacre delivers the high quality, durability, flexibility and unsurpassed performance that you should expect. Our packaging systems meet the rigid sanitary specifications and high speeds necessary for the demanding environment of the cheese industry.

Why choose HayssenSandiacre?

Versatility - HayssenSandiacre and Rose Forgrove machines run a variety of bag styles for retail and food service applications. Integrated zipper (slider or press-to-close) and many other bag styles and options.

Reliability - Patented Measure, Form, Pull \times 1m advancement, Allen-Bradley controls, rugged, tubular frame. Quick, no-tool changeover.

Application Experience - HayssenSandiacre has over 50 years experience packaging shredded, grated, cubed, sliced, and chunk cheese. With our past anchored in our knowledge of the industry, we continuously look to new innovations.

Operator and Maintenance Friendly - Open, modular design. Uncomplicated HMI that utilizes established operating procedures via sound software architecture powered by Allen-Bradley platform.

Integrated Systems - Custom packaging solutions. We have extensive experience in the integration of augers, pumps and other feed systems.

Customer Support

- **Technical Support:** Free technical phone assistance, 20 factorytrained regional service engineers, full time dedicated training staff provides formal training classes in your facility or ours (bi-lingual), customized preventative maintenance programs.
- **Aftermarket/Parts:** Parts availability 7 days a week, dedicated parts representatives and inventory on the "top 300" parts ensure quick turnaround.
